WOW. just WOW. **Because those are the people that actually developed Smalltalk and do lead the community by right of merit.** YOU JUST CLAIM CREDIT AND PUT YOUR SELF IN FOCUS! (and every computer scientist cringes because of your many wrong claims about Smalltalk or other languages)

These people do not f\*cking own Pharo or Smalltalk. It belongs to the **entire** Pharo community, including those who support me.

I'm curious why you don't acknowledge my tremendous success at Smalltalks 2018. Is it because it would ruin your narrative that Smalltalkers everywhere object to what I'm doing?

Your "success" consists of claiming credit, publicity and applause for the work **THEY** have accomplished. You are a hog.

There is something called community ethics: You are making politics ("Advocacy") against the advise of those, who actually know what they are talking about, because they created it.
